

2-Factor Authentication Requires 2 Things to Gain Access to Various GT Systems

What is 2-Factor Authentication?

Imagine needing 2 unique keys to access a secure system.

A thief needs to steal both keys in order to get what's in the safe.

What 2 Keys Are Required At Georgia Tech?

1. Your GT account password
2. Something you have in your possession
(Cellphone app, office phone, or passcode. You decide; there are options.)

Here's How It Works | Techworks Example
